

# Microsoft Teams 365 Azure App Admin Approval

---

## Overview:

Some organizations may choose to control the use of enterprise applications in Office 365 by restricting the ability for users to consent to third-party, multi-tenant applications accessing user profile data in Azure Active Directory.

The default Azure AD configuration allows user consent out-of-the-box, but this can be restricted from the Azure Active Directory within User Settings in the Azure Administration portal.

## Microsoft Admin Approval Flow 1:

If this setting is set to "No", then the user may get the following error message when trying to install the NovoEd application.

If you receive the error message above, **do not** log in with a Microsoft Admin Account. You will need to get your Microsoft Organization administrator to grant admin access to our application prior to the NovoEd admin trying to install the application.

Have the MS admin go to:

[https://login.microsoftonline.com/{tenant-id}/adminconsent?client\\_id=0dacc6b9-6574-4413-a2dc-091d4e531602](https://login.microsoftonline.com/{tenant-id}/adminconsent?client_id=0dacc6b9-6574-4413-a2dc-091d4e531602)

Or [Click here](#)

replacing the {tenant-id} with the MS tenant-id of the organization, and provide global admin consent for all users to use the application within the organization.

The MS Admin will see the following approval request.

The screenshot shows a Microsoft permissions request dialog. At the top is the Microsoft logo. Below it, the title reads "Permissions requested" and "Review for your organization". The application being requested is "NovoEd Teams Meeting integration for Live Events" by "NovoEd Inc". The permissions listed are: "Maintain access to data you have given it access to", "Sign in and read user profile", "Read all users' basic profiles", "Read user's online meetings", and "Read and create user's online meetings". A note states: "If you accept, this app will get access to the specified resources for all users in your organization. No one else will be prompted to review these permissions." Below this, it says: "Accepting these permissions means that you allow this app to use your data as specified in their terms of service and privacy statement. You can change these permissions at https://myapps.microsoft.com. Show details". At the bottom, there are two buttons: "Cancel" and "Accept".

Once accepted the NovoEd admin is able to finish the NovoEd MS teams installation.

## MS Admin Approval Flow 2:

The IT organization is able to set up an approval process that is initiated by the installation of the NovoEd App.

When the NovoEd admin attempts to install the NovoEd app they are asked to complete an approval request, by completing the justification and clicking on the “Request Approval” button.

Once completed, the IT organization will be alerted for approval. After IT has reviewed the request, the requestor will get an email with the request disposition. IF approved, the requestor can proceed with the installation process. Now, it will install properly.
